THE JOURNAL OF CONTACT (U.K.)

A W A R E N E S S

JUNE 1970

THE INTERNATIONAL SCENE - 2 -

by

Brinsley Le Poer Trench

International Chairman

The thoughts of all our members, both in Contact (U.K.) and in all our member countries, go out to Mrs. Carol Halford-Watkins, international committee member for Contact (Canada), and her husband, Darrel. In an air mail letter just received from Carol, she apologised for the delay in answering letters and other material, and explained that this has been due to her husband suffering a series of heart attacks. Darrel was taken to hospital but although he has had further recurrences of heart trouble, he is now much better. Carol has spent many nights by his bedside and this, on top of her own recent illness, has proved very taxing. All our warmest thoughts go to both Carol and Darrel, coupled with our very best wishes for Darrel's complete recovery.

In my article in the March issue, I wrote about vicissitudes which had kept Contact (U.S.A.) from 'getting off the ground', and stated that Mrs. Madeline Teagle (incidentally her name should be spelt Madeline and not Madoline as published in the March edition - my mistake) was the third international committee member in that country to 'have a go', and I hoped that it would be a case of third time lucky. Well, I am very happy to report that it is. Mrs. Teagle is doing splendidly and already has over a hundred members, and furthermore, hopes shortly to start a magazine for her members. If Madeline continues with this momentum I foresee the time not far distant when Contact (U.S.A.) will be the country with the largest membership in our movement. Of course, this is only right and proper as the U.S.A. is not only a very big country but so much UFO-wise has happened there during the last two decades. Good for you, Madeline. Well done!

Now I must apologise to Mr. Leon Broch, international committee member for Contact (Switzerland) for not mentioning his fine efforts in my March article. I had put down on pieces of paper what I was going to write in capsule form about each member country, but for some inexplicable reason our good friend, Mr. Broch got left out. I can only think that as the window was open and a breeze was blowing that his bit of paper got swept off my desk! Anyway, my fullest apologies Mr. Broch. I had the pleasure of meeting both Mr. & Mrs. Broch when they came to London last year and we had a most interesting discussion about the UFO situation. Mr. Broch described to me a personal sighting which took place in Switzerland. He has some friends in Lausanne interested in the subject and we wish him well in building up Contact (Switzerland).

It is my pleasure to announce our 24th member country. Rhodesia! We in Contact are non-political and seek out spiritually orientated people in all

countries who are interested in our sky visitors, wherever they are: behind the iron curtain, in Latin America, South Africa, Rhodesia or the polar regions.

The saucers have appeared all over the world and do not apparently recognise our political boundaries and neither do we. If we reach behind the iron curtain it does not mean we are communist; if we are to have a group in China it does not mean we go along with Mao's thoughts and if we have a fine group in South Africa (which we have) it does not necessarily mean we go along with Mr. Vorster's views, and the same goes for Rhodesia in regard to Mr. Smith. Everyone in Contact is entitled to his or her opinions on these matters either pro or con, but as a movement we are interested in seeking out like minds in all countries, and so, we are very happy to welcome Mrs. Rhona T. Dippenaar, as our international committee member for Rhodesia.

Mrs. Dippenaar has already got a few members together, and is busy contacting friends in Zambia and Victoria Falls (300 miles away from her base in Bulawayo). She is very enthusiastic about our June skywatch. Her address is 100, Percy Avenue, Hillside, Bulawayo, Rhodesia. Needless to say, Mrs. Dippenaar will be delighted to hear from other member countries. Please write and make our new friend welcome.

Our dynamic and charming international committee member for Contact (Belgium), Comtesse R. d'Oultremont, recently wrote that a Mr. Roger Lorthioir, had given an interesting lecture to her group, illustrated with some slides. The Comtesse has asked me if I know of anyone who could provide her with either slides or films of UFOs which she would be prepared to purchase for forthcoming talks that she will be giving herself. I have recommended her to Miss Rey d'Aquila, international committee member for Contact (Holland). Will other international committee members please note that Miss d'Aquila has some excellent films available for sale about the UFOs and possibly, also slides. These will be invaluable for talks. Miss Rey d'Aquila's address is: Beeklaan 431, The Hague, Holland.

Mr. Philip R. Austin, international committee member for Contact (New Zealand) has written that his group is progressing well and members are coming in fine. He, also, hopes shortly to start a magazine for his members and copies will be distributed to international committee members of other countries. Thank you, Philip. Incidentally, he tells me that New Zealand has had quite a 'flap' recently and that mysterious circles have appeared in various parts of the islands with squashed grass and vegetation, and strange markings.

Until the next time,

Good sightings and keep in touch

- - - - -

FORTY FLYING SAUCERS OVER THE VATICAN CITY.

By Dr. Alberto Perego, Chairman of Contact (Italy) - (continued from last issue)

* * *

After this I went to visit the Vatican Observatory at Castel Gandolfo, near Rome. Father Zilwes, the Director of "Specola Vaticana", told me that on 12th November '54 (about 11 a.m.) a Brazilian 'brother' in charge of the services, had seen some strange objects passing twice over the Observatory very low, at a terrific speed, and without any noise. It was the proof that these machines had been noticed, not only over the Vatican City, but also over the Pope's Observatory.

Father Zilwes denied any possibility of interplanetary craft. He could accept the possibility of a new kind of aviation, "teleguided" experimented by some great power (U.S. or U.S.S.R.). In his opinion, one hundred craft could be teleguided by one hundred pilots, sitting in the same room, (in a Base), each one in front of his instruments of teletransmission. This conversation forced me more towards the error. If the machines I had seen on the 6th and 7th November, 1954, were teleguided by men, they could only be Russians.

Two years later when I reached the extraterrestrial conclusion, Father Zilwes wrote to me, (20.11.56): "We have found very interesting things in your report. Maybe it is the most complete in the problem of the so called flying saucers. But why did so many scientists, whom I met at the Astronautic Congress in Rome, not consider this problem at all?". The answer I gave to Father Zilwes was very simple: because all the Governments keep this matter secret.....and all scientists receive Government salaries. So they prefer to keep silence.....!

Nowadays, (1969), I suppose you accept that UFOs are material crafts, originating from different planets, of different systems, guided or teleguided by a different race of men. I suppose too, you accept that these craft have bases on the Moon: and on the Earth! I also suppose you accept that these craft have been seen from time immemorial, by human beings. So, it has been our "scientific ignorance", which had forced our ancestors to imagine that these machines were all kinds of things: gigantic 'eggs', gigantic birds or insects, gigantic 'medusas' etc. And later, vehicles of Gods or Devils!

After twenty five years of sightings and landings, in 1969 our scientists are in the same position as our ancestors. They cannot explain UFOs and, for this reason they deny the existence of these craft. They speak of meteorological phenomena, of ectoplasmic formations, of optical projections etc. In spite of this incredible scientific ignorance, today we are absolutely certain that they are craft, guided and teleguided by men having extra - terrestrial origins. (Because we have seen them, Prof. Condon!).

For aeons they have had underground bases on the Earth, for their use and necessities (not only to observe us!). Considering that they must travel from planet to planet (because the Cosmos is composed of Suns and planets), it is easy to understand why Earth represents a kind of gigantic Air Base to them.

From 1941/42 they began to be alerted by our atomic experiments and they found it necessary to prevent an atomic disaster which might affect their underground bases (of different peoples, from different planets and systems). This is the main reason why the Governments are afraid to tell the truth to the populations. This is also the main reason for the confusion still existing among many of us, because we do not know whether these peoples are here on a good will mission or if they are hostile. In my opinion not one of those populations visiting the Earth is hostile towards humanity. But we can make a distinction:

- 1) those who do not take any interest in our life;
- 2) those who try to protect us from different dangers;
- 3) those who, sometimes, use strong methods of warning, which could be considered hostile (but in fact, they are not).

All these pilots are scientists and they observe different aspects of life. They study the magnetic field of the Earth, the geological, Seismological, ethnological, zoological and botanical aspects (etc.etc.) of life on Earth.

But during the last twenty five years, (1942-1968) it has been evident that some of them are particularly interested in Atomic Centres, Military Bases, Missile Bases, Electric Power Plants and high tension lines. Why?. To be able to stop in a few minutes, an atomic war. They have demonstrated many times how they can do it, by cutting all telecommunication, cutting electric power and destroying our atomic weapons (wherever they are). At least ninety per cent of sightings and landing of UFOs took place near strategic points of the Earth. If we ask for proof it is sufficient to remember the colossal New York 'black-out' (9.11.65); and other famous black-outs like, London (15.11.65); Texas (2.12.65); Holland (3.12.65); Bonn (4.12.65); Stockholm (6.12.65); Canada, Alaska, Texas (12.65); Melbourne (15.12.65); Buenos Aires (25.12.65); Naples (8.1.66); Colorado, Wyoming, Nebraska, Utah (26.4.66); Barcelona (26.6.66); Portugal (4.11.66); Madrid (5.11.66) etc. They are opposed to an atomic war: not to conventional wars, (i.e. if we do not use nuclear weapons). The proof is they did not interfere in the last two World Wars, and the forty local wars we had after 1945. (Korea, Formosa, Congo, Liban, Indonesia, Algeria, Cyprus, Vietnam, Pakistan, Israel, Egypt etc.). This happened because these conventional wars did not produce any damage to their underground Bases. They oppose only an atomic war, with no preference to one Nation or another. This is very understandable: because we all know what would be the terrific consequences of an atomic war; (independently of our good reasons, this war could be started).

We are occupants of the surface of the Earth. But from the strategic point of view, the Earth belongs to them. This is the reason why no Government, no Church, no University has the courage to tell the people this new reality. But as they insist on appearing, this means we must accept this new reality.

To be continued

BETWIXT EARTH AND SKY

by Paul Screeton

That fascinating pursuit ley hunting, once the spare time occupation of a ridiculed minority of archaeologists, had almost vanished until it received a boost from an unexpected quarter. Alfred Watkin, who pioneered research into alignments of prehistoric antiquities and old parish churches, believed the leys - as he christened them - to purely mark trackways. Maybe he had an inkling that they were something more, but he and his fellow enthusiasts in the Straight Track Club concentrated their efforts on collecting evidence to support the theory that prehistoric man travelled everywhere in straight lines. Yet it was a S.T.C. member, Major F.C. Tyler, who postulated that many sites were also located on important sites such as Stonehenge, and found the radii of these circles were all multiples of a prehistoric unit of length discovered by fellow S.T.C. member Arthur Lawton.

It was Lawton, it seems, who in "Mysteries of Ancient Man", first related leys to a grid of "power" emanating from the earth these radiations being the clue to the real purpose of the ley system.

This 1938 publication saw the beginning, oddly enough, of a demise in interest in the subject, and it was not until another brief publication appeared in 1961 that interest was re-kindled.

Kent artist/designer Tony Wedd's booklet "Skyways and Landmarks" connected the subject of leys with UFOs. This apparent first attempt to link leys and orthoteny introduced a whole new line of research and whole new sector of the public to the subject.

Orthoteny, as most ufologists are aware, is the theory that UFOs fly in straight lines, and Aime Michel's book "Flying Saucers and the Straight - line Mystery" propounded the theory that one days sightings of different UFOs travelling in different directions can be plotted on a straight line. Many ufologists, however, including Dr. John Cleary-Baker and Stephen Smith, both of BUFORA, have researched the subject of orthoteny and come up with either no evidence or their findings were inconclusive. Yet others such as Tony Wedd believe there is a definite link.

John Michell, who promoted the connection between leys and flying saucers in his books "The Flying Saucer Vision" and "The View Over Atlantis", and also wrote articles in "underground" publications, wrote in a letter to The Ley Hunter: "I think most of us realise that the phenomena of UFOs and prehistoric alignments are in some way related. After all it was the reports of UFO sightings that led to the present re-examination of the ley system. Alfred Watkins was years ahead of his time, and had it not been for Jimmy Goddard and a few others, who some years ago first suggested an association between leys and UFO paths, his work would have remained neglected. But unfortunately the association is very hard to prove. The ley system stretches all across the country, set out with the accuracy of a modern surveyor.

The precision of alignments between individual standing stones can only really be appreciated on maps of the 6 inch scale. On the other hand, very few UFO reports contain any exact information on the location and direction of sighted objects. In general, UFOs, and also migrating birds, do appear to follow certain lines of exceptional magnetic properties such as geological faults. The earth's magnetic field, and everything within it, is directly influenced by the sun, moon and planets, and this may well explain the prehistoric practice of astronomy in connection with leys and alignments. The legends of dragons as manifestations of cosmic energy indicate that the phenomenon of UFOs was known to the prehistoric astronomers as it still is to primitive people, and that its nature was once far better understood than it is now. That is why I believe that the most rewarding approach to the problem of UFOs may be through the study of prehistoric science and philosophy".

If we do accept there to be a connection between leys and UFOs then we must ask "how?" and "why?".

Tony Wedd believes the leys were used by UFOs to pick out landmarks, but I consider that the obvious sophistication of these craft and the exceptional speed at which they normally traverse our skies makes this extremely unlikely. However, the answer could lie in the "power" emanating from leys: possibly certain (or all) such craft use this in some way either solely for propulsion or for direction-finding on major leys - using leys "blind" as if homed on the line, rather than looking and navigating along them. This is wholly speculation as the nature of the "power" is not known - and neither is the method of propulsion used by UFOs. Yet Warminster is a remarkable ley centre and, of course, a UFO centre.

Another suggested link between leys and UFOs is that prehistoric man, when plotting the ley system and marking it, received help: help from the occupants of UFOs. Books such as Brinsley le Poer Trench's "Men Among Mankind" make plain the obvious conclusion that mankind was in contact with UFOs in prehistoric times. What is less easy to determine is the nature and extent of their aid. Did they educate prehistoric man in the sciences of geometry and astronomy to specifically enable them to map the leys, or did prehistoric man do this unaided? Is it coincidence or imagination which makes Stonehenge look from the air like the conventional disc-shaped UFO, even though the work of Professors Hawkins, Hoyle and Thom has revealed this circle of stones to be a fantastic computer. And is it significant that the huge zodiacs laid out on the land can really only be appreciated from several miles high?.

So much speculation may deter the scientifically-minded and attract the crank, but we must not be afraid to put forward such ideas, provided we make it sufficiently clear that it is purely speculation.

Alfred Watkins was mocked for his pains, but he staunchly continued his researches, even though those who denigrated him have been found to be partially correct. Many leys go over precipices or through bogs, and if they were simply tracks they would make far from easy routes for a traveller.

It seems that the use of leys as paths followed their prime purpose as markers - not simply because it was convenient to go from one marked spot to another, or that their original purpose had been forgotten, but because the "power" is beneficial. Their use was not forgotten until much, much later than the Roman invasion, as evidence shows that churches, probably to pre-Reformation times, were built on them, so some knowledge of their special nature and sanctity was remembered.

Nevertheless little is known of the nature of leys and it will be a long time before they become academically acceptable. A mathematical probability theory has been worked out by Tony Northwood, of Bedfordshire UFO Society, and work is needed to apply it to leys throughout the country, so as to prove beyond doubt that leys exceed probability. In a case where he used the formula he found the chances of six sites falling on a straight line to be 1 to 35,400,000,000,000,000,000,000,000,000,000,000,000,000,000.

This approach proves alignments exist, but gives no indication of their nature. For this we need a form of divining (dowsing) which will show where leys are and indicate their nature to a "sensitive" person.

Certain properties of leys have been propounded, including the supposition that they encourage fertility of the land, that at certain times of the day a sound can be heard along leys, that they have recognisable hues of colour, that they have geographical forms slightly different to their immediate surroundings, and that at certain "power" centres a buzzing is felt in the head.

To the archaeologists the leys are fascinating because they suggest prehistoric man was highly scientifically advanced, far beyond the level of intelligence academics give him credit for.

To the ufologist the leys are fascinating because they may hold the clue to the mystery of the flying saucers.

OPERATION EARTH

by Brinsley Le Poer Trench

CRITICAL REVIEW

by
J.B. Delair.

This is an eminently readable book which, although not beyond criticism, should be read by all those interested in UFOs and related subjects. Concerned more about theorizing about UFO sources and the possible intentions of their owners than with recording new sightings or analyzing the facts embodied in them, this book nevertheless details several hitherto unpublished UFO reports of considerable interest, and contains a number of new photographs which may or may not have connections with the UFO problem.

The author speculates at some length that UFOs probably emanate from two

principal sources---an invisible one near Earth itself (although the exact location is not pin pointed) and populated by entities considered to have hostile intentions towards Mankind, and a more distant source (again unlocated) associated with an allegedly benevolent, or at worst indifferent, group of beings called the "Sky People". The former group is accredited with having rather low moral and ethical standards (compared with Earth standards), and the latter with a higher level of conduct. Both groups, it is suggested, are currently engaged in a titanic struggle to gain control of Earth, and presumably of Mankind, a surmise from which this book derives its title.

Mr. Le Poer Trench also devotes space to the mysterious "Men in Black", who have reputedly silenced certain UFO researchers, or who have allegedly been instrumental in the closing down of various "saucer-groups". These "Men in Black" are, so Mr. Le Poer Trench suggests, probably linked with the invisibly located hostile entities already alluded to, and, in this way, the UFO creators and owners are divided up into the proverbial "goodies" and "baddies". While this arrangement appears to be entirely satisfactory from the authors point of view, it nonetheless possesses serious disadvantages. For example, we are not yet in possession of sufficient evidence to positively state that the division proposed by Mr. Le Poer Trench is in any way valid. Neither, of course, can such an interpretation be disproved, for the same reasons; and, it should be constantly remembered conclusions based on analyses of facts not as yet fully understood by us tend only to lead to theories and hypotheses, not to definite or categorical statements of fact. Yet, as Mr. Le Poer Trench points out, we would do well to consider all possibilities, however remote, in order that we are not totally unprepared by what eventually transpires. The major obstacle to theorizing along these or any other lines, of course, lies in the fact that our thought-processes are conditioned by an Earthly background, whereas the known evidence almost certainly has an extraterrestrial origin and exemplifies thought-patterns beyond our present capacity to evaluate or comprehend. The hypothesis advanced by Mr. Le Poer Trench, therefore, is another to be added to the now already long list of possibilities with which, as he rightly contends, we should be fully aware.

Attention is also focused in this book on the known increase of seismic activity during the past ten years or so and on the more or less simultaneous increase in UFO reports for the same period. Research on this aspect of ufology, perhaps in conjunction with the theory of a world grid-system used by the UFOs, as advocated by Cathie in HARMONIC 33, could well yield important new information relevant to the UFO phenomenon. Mr. Le Poer Trench is to be congratulated on drawing attention to this possibility.

The overall impression afforded by OPERATION EARTH, therefore, is that this is the work of a lively and perceptive mind having the ability to present involved subject-matter in a direct and lucid manner. It is, however, to be deplored, perhaps, that the author found it necessary in the latter chapters of his book to discuss recent and contemporary social revolutions, "hippies", and other modern cultists who, despite arguments advanced by Mr. Le Poer Trench, surely have little or no real connection with the UFO problem, and which, for this reason, can scarcely

be justifiably included in a work purporting to deal with UFOs. On the "other side of the coin", however, Mr. Le poer Trench makes very considerable amends by including a first-class bibliography of works on UFOs or related problems, and, as such, OPERATION EARTH will be of particular value to ufologists for years to come. By any standard, OPERATION EARTH must be regarded as a significant contribution to the UFO literature.

Wootton,
Berkshire

ON COVETING:- THE TENTH COMMANDMENT

by Tony Wedd.

The following discourse was made from a tape recording made by me between four and five o'clock in the morning of 29th October, 1961.

Blessing! It was rather difficult/hard for you to understand just what is meant by coveting. We think you can help us to bring new knowledge to the Earth at a time of need. Her ways are not our ways. There is much to reprove. Conditions are hostile to the development of real spiritual values. Lacking these, you feel a sense of lacking something you need. You look around, but your eyes are not opened. What you see are material goods not the spiritual growth to which they are able to contribute. You seek no further than this. You ask for more of these things, but there never is a point at which you have enough. The more you have, the more you want. This is true of an individual as well as of a nation. It is like a sort of hunger, a lack of basic ingredients in the diet. You crave for more and more food, whereas what your body is really in search of is a very small amount of the product you specifically lack. What you require is a proper balance. When the scales tip, it is useless to continue to pile things on to that side which has descended. You must stop piling on, and find some equivalent, balancing commodity which will restore the balance. So with material goods. You will find a point of balance beyond which you will become covetous. What is needed then is a suitable increase of spiritual power which can restore the balance, and the evidence of the proper balance is a restoration of contentment, the removal of one's covetousness.

Spiritual power too can be coveted by others, and they may wish for more physical power as if that were a suitable equivalent. Talk to these people, and you will see they lack contentment. They also have an insatiable need. Nothing satisfies them, and they continually seek more power, striving to conquer more "territory". This is the motive which is imputed to us. We do not come to conquer and destroy. We have found contentment - such contentment as is possible when our lives are threatened by new discoveries on the Earth. When the basis of the ceaseless changes is that of a people who have not found inner satisfaction, we can only set things right by restoring the proper balance of things on the Earth.

We come in peace and brotherhood to try and show Earth men the way of Truth.

Blind to all inner calls, your leaders drive you on towards more dangerous conflict. You are not to heed them, for they lead you only to destruction. For the measure of their power is only the amount of destruction they can obtain. Material goods are a challenge to destroy: they do not covet them as men ordinarily do; but their behaviour is such as to take away possessions from men around them. Into the vacuum they pour more goods, far more than are really required; they create wealth for those that serve them, and they invite covetousness from those that do not serve. Here again they map out the area of future conquests, since another man's wants can be turned to their gain. But they are never satisfied, and though the whole world were to come under the one power, still there would be no contentment, and you would look into space for future territories to conquer.

Already these people suppose that the coming of the space ships means someone else is coveting the Earth as a home, and preparing to invade. This is far from the truth; and one of the reasons we make no spectacular appearances, preferring to remain something of a mystery. So we challenge man to expand his spiritual powers: to explore and to seek for the godlike side of himself in others. Having discovered it in others, he will learn to recognise it in himself.

We do not lack plenty of material goods: but all that we have is for you to share if you care to make us welcome. We are rich beyond your dreams, but we do not depend on riches. We are content with simple things, and the discoveries we are looking for are all the ways in which we can bring help to you. So it is with various free energy machines. They can be useful to you. Their usefulness to us is the possibility that you will learn more about us and more about our ways. There is no strife, to drive us on blindly to new discoveries. We keep a control on our work, knowing what we are seeking for and finding out a way to do something we have already conceived in principle.

You have observed some doubt as to whether the formula we are communicating to you is for communication purposes or for physical utility. And the type of machine we are trying to give you has this double function. We know you will understand the advantages of them in a material way. We hope you will discover how to use them in a spiritual way.

That is all for tonight.

(0415-0504)

The foregoing discourse seems complete in itself, and I only wish to add a comment on the form and on the content. It purports to come

from space people, but this I cannot fully substantiate. I have no physical proof to support the claim that it is anything more than a writing from my unconscious mind: subliminal writing. It was not composed or in any way deliberated. I just allowed the ideas to come, and some of them formed themselves in pairs of synonyms, which is unusual for me, but typical of many of these communications.

What it seems to me to describe is what in Canada is called a potlatch by the red Indians, who, when they reached a point of affluence, called all their friends together and distributed all their material goods, so that they were paupers dependent on their own labours and the next potlatch for even the minimum of goods. The white man, knowing not the reason, made the potlatch illegal. This communication on coveting therefore offers a reasonable explanation: wealth must not allow the owner to neglect to develop his spiritual potential. So, the next time you find yourself expressing sentiments of discontent, ask yourself what you ought to give away to worthy causes, the local jumble sale or the treasurer of "Contact". Make a penance of it, if you like, to punish yourself for ingratitude; for how ungrateful of you not to get more satisfaction out of owning these things than he who has them not. "Unhappy lies the head that wears a crown". Yet the remedy seems all too simple. Put off the crown: such a ridiculous piece of headgear, and uncomfortable at that: just a symbol of affluent status, and no guarantee whatever of spiritual contentment.

LETTERS

Dear Sir,

I was in Donnington, Shropshire during the end of the last war, and one evening, a Friday in April or May 1947, at 5.30 p.m., I looked up and saw what I thought was a high-flying aircraft, shining in the sunlight and coming towards me. However, on watching it I saw that it did not move, and I knew we had no aircraft that could hover at that height. I thought a star must be burning itself out, when suddenly the light went up and out of sight.

I then thought it must be people from another planet coming to see what is happening on earth, because the atomic bomb had been exploded

on Japan, and I also thought the red light on the top of the Wrekin hill may have attracted their attention. (Donnington is near Wellington, Shropshire).

During the past week heavy snow had fallen, and when I went into the garden I found a single track about an inch wide had gone across the gardens. It started on a dirt path, crossed the snow, lifted over the top of low bushes, descending again on to the snow across the front gardens of three of my neighbours, as across mine, stopping at the dirt path of the third neighbour. I thought at first that the boy next door had ridden his bicycle across the gardens, then I realised there were no footmarks where he would have had to get off and lift the bicycle over the fences. There were no tracks of the small feet of an animal. I wonder, do the craft come so low that we may know they are here, leaving tracks like this for us to see?.

K.E. Blayrey, Barnet, Herts.

A correspondent in Surrey writes:

Dear Sir,

The plain truth is that Contact (U.K.) deserves every criticism that I have levelled at it. The appointed leaders of the organisation are ignorant, opinionated fools who presume to instruct, organise and "milk" others because of their own ego-drives, rather than for the benefit of those whom they attract; and for the ultimate beneficial linking-up with our - supposed - Space Brothers.

In my opinion it is, at its administrative level, a club for unscientific dillettantes, and for that reason has as much hope of attracting the true Brethren, as petrol would bees.

Name and address supplied.

NOTICE BOARD

Annual General Meeting, Caxton Hall, 16th May 1970

The meeting commenced just after 2,00, chaired by National Chairman Mr. F. Passey, who, in his opening remarks, said he was sorry to see the rather poor attendance at the meeting, but thanked those who had come. He also thanked the committee for their efforts in the past year.

In his report, Jimmy Goddard described how the past year had been a year of growth for Contact (U.K.) in membership and activities, and after this the Treasurer, Derek Mansell, presented his report, and the accounts for the year ending March 31st, 1970, which are as below:

The accounts were adopted unanimously, and Derek pointed out that he had received 150 subscriptions (including renewals and new subscriptions) since March 31st.

After this, the Constitution and Aims of the organisation (as published in Awareness for November 1969) were presented to the members and accepted unanimously.

As there were so few members present, it was asked that the committee be re-elected en bloc, if there was no objection to any of the present committee members. There was no objection, and the committee was duly re-elected, for one year.

Derek then made the suggestion regarding subscriptions etc., which is outlined later in this issue. A member then mentioned the possibility of cutting down the issues of Awareness from four per year to two, but this was generally opposed as it would tend to make people lose interest, and cause lack of cohesion in the organisation.

Also discussed were the question of how people can be encouraged to attend Caxton Hall meetings, the possibility of a cheaper hall, the content of the proposed UFO Register and Derek also mentioned an agreement between Contact and the Sunday Express for the exchange of UFO information.

Mr. Passey closed the meeting at about 3.00, after which there was some general discussion on UFOs and related subjects.

London Meetings

These will re-commence in September; a list of dates is enclosed with this issue, with a list of BUFORA and Cos-Mos London Meetings

Competition

We are shortly going to print new membership cards as our stocks of the current ones are running out. If you have an idea for a design for the new cards, please send it to Derek Mansell. The prize for the designer of the winning entry will be one year's free subscription.

THE COMMITTEE

Chairman:	Mr. F. Passey, 59d, Windmill Road, Headington, Oxford Tel Oxford 63729
Research Officer and Membership Secretary)	Derek Mansell, 75 Norreys Road, Cumnor, Oxford. OX2 9PU Tel Cumnor 3320
Secretary:	Jimmy Goddard, Wynchlands, Walton Bridge Road, Shepperton, Middx. Anne Patterson, 413a, Upper Richmond Road, London S.W.15. Tel 01-878-3914 Doris Cropper, Address c/o Jimmy Goddard. David Lloyd, 23, Vardens Road, S.W.11. Tel 01-228-3448 A. Brewer, 73 Treyford Close, Ifield, Crawley, Sussex. Adrian Turner, Address c/o Derek Mansell.

Change of Address

Please note that from the date of their marriage, August 1st, the address of Jimmy Goddard and Doris will be: Astrohaven, 25, Albert Road, Addlestone, Surrey.

Subscription to Contact is 10/- per year, (5/- for people under 16), payable on March 31st each year. Members receive a membership card when they join, and the Journal Awareness.

Articles and letters from members would be very welcome for publication in Awareness. We would like to take this opportunity of thanking all those who have contributed in the past, and all who have written to us. Remember, this is your organisation and your magazine - we would like to see your views, ideas and opinions published in it.

Advertising rates for Awareness are as follows: Half page £2, Quarter page £1, Eighth page 10/-. We are also willing to consider exchange advertising. Applications for advertising must be passed by the committee before being accepted.

Would anyone who knows the address of Miss S. Stead, please contact the Membership Secretary.

Notice from the Treasurer and Membership Secretary

Many members have been asking that Contact (U.K.) be made a more scientific organisation and that the magazine Awareness be improved.

Now I and the rest of the Committee are behind this, but it will take some time to achieve, also it will take more money to put this into practice. I would like to suggest an increase in subscriptions to 20/- per year for those over 16 and to 10/- per year for those under 16. For this, the members would get four issues of Awareness and two of UFO Register, so everyone would be getting extremely good value for their money.

I would like this to take effect from March 31st 1971, however it is entirely up to you, the members, whether this takes effect or not. So if you object in any way, please write to the membership secretary, Mr. D.N. Mansell, 75 Norreys Road, Cumnor, Oxford, OX2 9PU, giving your objections, before July 31st 1970.

I can promise you that Awareness will improve and will be issued on time, and that the UFO Register will be issued at the correct times, and that the money will be well spent on such things as research, organising the tape library and other aspects that a well run organisation should have.

May I add that at this stage, it is only a suggestion, if the results are good and I do not get many objections, it will be put before the committee in August for consideration.

A final reminder, that several members have not yet renewed, if renewals are not forthcoming, these members will not receive the next issue of Awareness.

=====

International Skywatch June 13th-14th

Contact (U.K.) will be taking part in this watch and following is a list of the watching points:-

Folkestone, Kent There will be three watching points, The Folkestone Putting Course, Dover Hill and the Sugar Loaf. Organiser is Mr. P. Harris, 14 Warren Way, Folkestone.

Plymouth, Devon The watching point is Kit Hill, Callington, Cornwall, map reference SX 376 713, organiser is Mr. D. Weeks, 68 Woodville Road, North Prospect, Plymouth.

Dorking, Surrey The watching point will be Newlands Corner, near Guildford. Organiser is Mr. F. Woodcock, "Alta Vista", 31, Glebe Road, Dorking.

Thorpe Bay, Essex. The watching point will be Morgaretting near the Tye (near Chelmsford). Organiser is Mr. S.J. Atkins, 8 Elizabeth Road, Thorpe Bay.

London The watching point will be, Caesar's Camp, on Wimbledon Common. Organiser is Mr. D. Lloyd, 23, Vardens Road, Wandsworth, S.W.11.

Oxford There will be no set watching point, but will be patrolling the following points, Harewell Atomic Research Station, Didcot Power Station and Hurst Hill, Cumnor, Berkshire.

Leeds, Yorkshire The watching point will be map reference 273 345. Sheet 96 Ordnance Survey 1966. We are sorry we have not had time to work out its location, before going to press.

-0-

DATA RESEARCH DIVISION

As you will all have seen by the last edition of Awareness, the data division is bringing out a new journal twice yearly, called the U.F.O. Register.

This journal will almost certainly be the best of its kind in the World and invaluable to all keen UFO enthusiasts. You will have seen what it is going to contain, no articles and no opinions, but only the true facts.

The journal will be out about June 30th, so please would you put your orders in for it immediately, the price is 3/- per copy inclusive of postage. You may order two issues together, if you so wish. Those people who do not order promptly, may be disappointed as we only have 500 copies, the remaining copies will be sold through a shop or agency, so they will certainly cost more than the 3/-.

INVESTIGATORS AND UFO REPORTS

We are still in need of many more good investigators. The ones we have at present are very good, but there are just not enough. I would like to hear from any interested parties, preferably over the age of 15, who would like to take on the job of investigating UFO sightings. The work does not involve too much, the research officer sending you reports in your locality, but also it means you must read your local newspaper, keep in touch with the newspaper editors and also the local police force.

As we are now turning out a UFO Register, it is essential that we have more investigators, especially from Yorkshire, Scotland, Wales, Devon, Cornwall, Birmingham, Lancashire, Nottinghamshire, and of course overseas. We certainly want more international investigators and especially ones who can speak English.

So please will anyone interested in the above jobs, get in touch with the research officer immediately.

Other vacancies to be filled are the following:-
We would like a person from each branch or any member from a County, to read every issue of their local County newspaper and extract all the UFO sightings from them and forward them to the Research Officer, but the reports need not be investigated.

Secondly, we would like people available, who would translate letters and newspaper cuttings into English. I would like to make out a list of people willing to do this, whenever such reports were received. Three languages which crop up all the time are Spanish, Portuguese and Brazilian, so anyone interested please contact the Research Officer.

Thirdly, something which applies to every member, any newspaper report of a UFO, please cut out, put name of the newspaper and date and forward immediately to the Research Officer. He will then get an investigator in that area, to check the report out. I hope you will oblige and help to make us a worthwhile scientific organisation.

UFO REPORTS

January 22nd 1970 Time 8.00 a.m. Place Cheriton. Witness Mr. P. Norman.

A round starlike object with a tail was seen, its colour was bright white. Size was as a head of a pin, held at arms length, its speed was unknown. Object was moving slowly towards the S.E. when it stopped, it was emitting smoke or vapour, it was visible for 15 minutes, then the witness just gave up watching it.
Report investigated by I.A.12.

.....

January 27th 1970 Time 8.50 a.m. Place Abergavenny. Witness Mr. R. Drew.

Witness was standing in office doorway, when he saw this round object, colour was bright red. Its size was of a pea, held at arms length,

its speed and height etc was unknown. Object was hovering and visible for about two minutes, when it suddenly "dematerialised".

.....

February 3rd 1970 Time 8.41 p.m. Place Woodford. Witness Mr. P. Bassett.

Witness was looking out of the window, when he noticed a strange object. It was an elongated shape of a brilliant blue object, better explained as phosphorous and flaring blue. The size was of a pea, held at arms length, its speed was faster than sound and seemed to be about one mile or more away. Object was visible for only about 2 seconds, it was also seen by a neighbour of witness whilst driving his car. Report investigated by I.A.30.

.....

February 3rd 1970 Time 12.10 p.m. Place South Woodford. Witness Mr. D.M.E. Kemp.

Witness had retired to bed, when he noticed two stationery lights in the sky. The objects were apparently round and bright yellow in colour; they hovered and changed brightness. Their size, was of a cricket ball, held at arms length, height and speed was unknown. The objects both went off on different courses and were visible for about ten minutes, they were also seen by witnesses daughter. Report investigated by I.A.30.

.....

February 3rd 1970 Time 8.30 a.m. Place Leytonstone. Witness Mr. R. Mc Carthy.

Witness was travelling as a passenger in a car, when he saw object through the car's windscreen. Object was shaped like two cigars, one above the other, in the form of a cross. The colour was glowing red and was visible for about one to two minutes, its speed and height etc was unknown. The object was the size of a pea, held at arms length. Witness thought object could have been an aircraft reflecting sunlight, however he thought it may have been going too fast for an aircraft. Report investigated by I.A.30.

.....

February 6th 1970 Time 7.45 a.m. Place Leyton. Witness name withheld by request.

Object was rather large and dome shaped, the size was estimated to be about 100 ft in diameter and the distance from witness, about 2 miles or more. The object was pale yellow and given as the size of a cricket ball, at arms length; it was stationary and visible for at least 15 minutes. Witness had seen an identical object about 10 days earlier, (details not known). Report investigated by I.A.30.

.....

February 6th 1970 Time about 7.40 a.m. Place Wanstead. Witness Mr. R.W. Allingham.

Witness was going down to breakfast, when he saw an object low amongst the trees, which he estimated was too large for Venus. The object was oval shaped and yellowish white, its size was of a pea, at arms length. It was stationary, about 100 ft high and about 500 yards away. Object was seen by one other witness. Report investigated by I.A.30.

.....

February 25th 1970 Time 6.45 a.m. Place Highams Park E.4. Witness's name withheld by request.

Witness looked out of bedroom window, on awakening, and noticed a half circle shape or dome shaped object. It was a dull orange and was the size of a penny, held at arms length; it changed shape and hovered, its speed, height etc was unknown, the object was visible for about 30 seconds.

Report was investigated by I.A.30, who was not entirely satisfied with the report. He could not interview the witness, also the report does not tie up with the newspaper account. However, he does think witness did see a UFO.

.....

February 28th 1970 Time 9.00 p.m. Place Trundle Hill. Witness Mr. S. Fairweather.

One object was seen, shape is unknown, but it was the size of a pea, at arms length, colour was white. Speed was about 100 MPH, its height about 1,500 ft, its emission was bright, i.e. reflection of light.

.....

March 5th 1970 Time 10.20 - 10.25 p.m. Place Chichester. Witness Mr. B. Marsh.

Witness had just completed a meeting of the college UFO group, when two other members rushed back, saying they had a real UFO outside. Object or objects, were just like two headlights, no shape was seen. Colours were red (constant) at first, then a red flicker, then as two headlights plus blue and green rotating. The two lights were as large as a full moon. The lights hovered, flickered and changed brightness, speed was fairly fast. There are many details on report which cannot be put in, due to space limitations.

.....

March 9th 1970 Time 7.50 p.m. Place Shefford. Witness Mr. P.G. Castle.

Object was seen coming into view from behind a nearby house, it disappeared into overcast in the Northern sky. The object may have been round, with a tail, or cigar shaped, its colour was bright white/gold, the size was of a pea at arms length. The speed was unknown, and its

height was estimated to be between 30,000 and 40,000 ft. It was visible for about 6-8 seconds. Object was also seen by another witness.

March 22nd 1970 Time 8.00p.m. Place Loughton. Witness Mr. R. Tripp.

Witness was writing a letter, when he looked out of the window and saw a bright star above the skyline. Its colour was changing from orange to white and appeared to be more rhythmic than twinkling. Object was slowly moving downwards and to the right, after several minutes, it became stationary and witness studied it through 12x50 binoculars. The object now appeared greenish white, but still with no shape. Over a period of 10-11 minutes, the object stopped and moved three times, before being hidden by trees.

Report investigated by I.A.30.

April 17th 1970 Time unknown Place Childrens Republic Argentine.
Witness Senor Raul Gaiton.

The witness was driving his car, when vehicle began to stall, he got out thinking something was wrong with carburettor. As the sky was clear and bright, he caught sight of a flying saucer. It was a dome shaped disc and travelling very fast, as it disappeared fairly quickly. However witness took one photo of object with an Asaki Pentas camera, it had 55MMTS Lenses and F.P.1460 film. Photo came out very clear, but too many details are yet needed, to see if report is genuine. We are trying to fill in this gap at present.

April 18th 1970 Time 8.30 p.m. Place Folkestone. Witness Mr. P. Harris.

Witness is I.A.12 and was skywatching at the time, object was also seen by another witness. The object was a flattened egg shape or like two inverted saucers, its colour was white and was the size of a sixpence, at arms length. Object was stationary and visible for about 10 minutes, it was seen through a telescope. Witness states, to prove it wasn't a mark on the lens, he moved telescope to another point and the object was not visible.

April 20th 1970 Time 9.52 p.m. Place Sheffield Witness Mrs. V. Birks.

Witness was passing living room window, when she was surprised to see a glowing red ball. The object was a completely solid circle, glowing bright red, its size was that of a cricket ball, at arms length. The witness looked through an open window, so it could not have been a reflection. Object moved very slowly and silently on a direct course and appeared to be below the clouds, it was visible for six minutes.

A note from the research officer:-

These reports are all cut down, to get them all entered in Awareness. The actual reports contain many more details, which are all evaluated and entered into the new U F O Register. Each report received, is fully evaluated, so I hope members will not think that we are missing out a lot of information.

Derek Mansell.
